what is Embody 3D ?

Embody 3D is an international online industrial design blog. We are dedicated to covering a whole array of topics including product reviews, tutorials and educational resources, latest fashions and trends, specific projects as well as events and news.

why contribute on Embody 3D ?

At Embody 3D we want to become the global destination of industrial design learning and collaboration on the internet. Embody 3D is striving to connect with individuals and businesses to promote industrial design work at a grass roots level and to assist professionals get exposure of their works throughout industry.

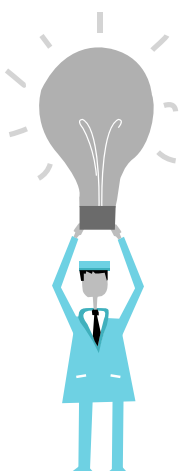

We are very different from competitor design blogs because we are an open blog. We encourage professionals to write and contribute, and unlike our competitors we give full ownership and credit to the work published on our site to the original author. In fact when publishing any content on our site you can link back to your personal portfolio website, email address, Twitter or Facebook account or anything of your choosing so there is an open line between you and potential employers or networks. Another key difference of Embody 3D is that our focus is clearly on education. The reason our blog started was that we found many design blogs just featured weird and obscure design projects. But we said "how is anyone going to learn about industrial design by just looking at weird industrial design photos?" So our articles aim to educate as well as entertain our audience.

On a personal level it is fantastic to document your experiences at work and with specific projects so you may retrieve this information when needed. Consequently you will also be able to harness other people's knowledge from around the world at one place.

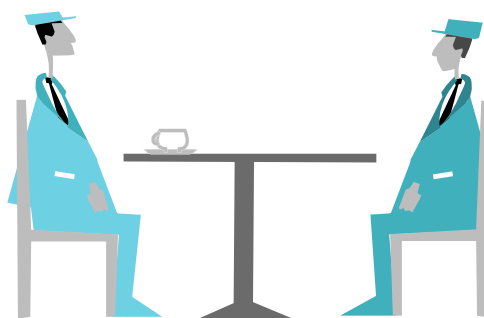

how to contribute ?

There are many ways to contribute on Embody 3D and the following page will give you some guidelines of how to contribute more specifically. You can contribute one off articles by filling out the form on our website: <http://embody3d.com/contribute/>

Alternatively you can contribute regularly and be part of our team of publishers. If you are interested in this please fill out the contact form on our website: <http://embody3d.com/contact/>

so what to write about ?

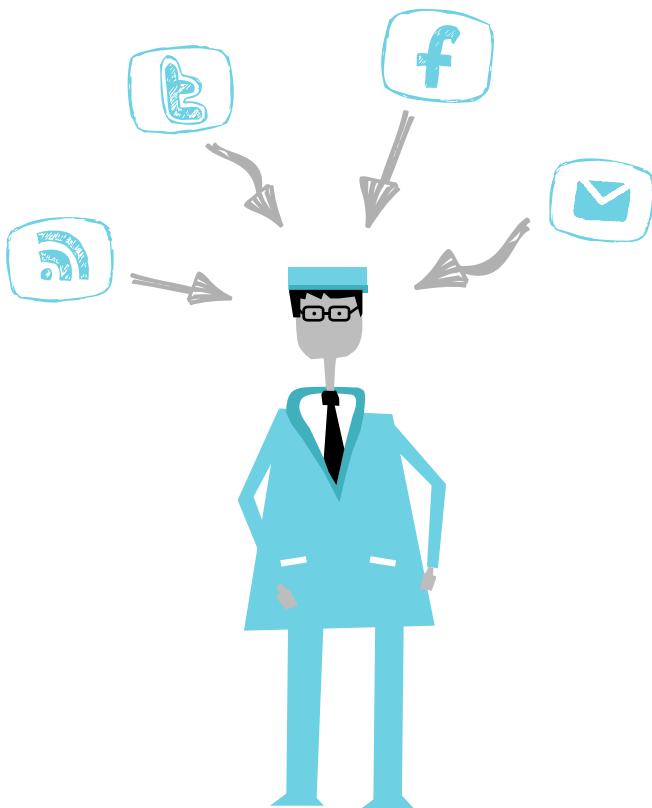

We would like to invite you to write anything that is on your mind industrial design related. Try and make your article stick out by making it relevant to others and thought provoking. Feel free to make your entry in a variety of mediums including: text, photographs, recorded videos (Youtube/Vimeo), live videos (Ustream), audio feed (Audioboo), sketching, podcasting or anything you can imagine!

Some formats we have had in the past include: educational topics, a top # list and critical reviews. The sky is the limit as to what you may want to talk about, it could be something you have learned at work or an experience you had at a job interview! It could be about: aesthetics, engineering, design theory, sketching, CAD, commercialisation, design law just about anything! Your article may be just one entry or it might be a whole series of articles.

Please note that we may filter your work to improve formatting, spelling, punctuation etc. for the website and some entries maybe refused listing if they are deemed inappropriate material.

your information is important to us !

Your personal information is strictly confidential and will not be shared with anyone at anytime. Articles or any content published on our site are owned by the content author (that's you!). We wont distribute any content unless your permission has been granted. For more information please check out our privacy policy.

your article will be promoted through a variety of social outlets automatically including Facebook, Twitter, Digg and Design Float

turning YOUR  3D!
